# D-TEC™ SYSTEM

## Hardworking Comfort Outdoors

Hard work in the outdoors creates heat and sweat, both uncomfortable and potentially dangerous. The D-TEC™ System works to keep hunters comfortable in any condition.

## D-TEC™ System. Maximum Comfort

Rain, snow, sleet, wind. The weather can ruin your day. In any condition, D-TEC™ works to keep you dry with engineered zones of comfort.

## Engineered Zones of Comfort

### Inner Layer

A special knit layer of spun fibers manages moisture by collecting perspiration and quickly wicking it away.

### Mid-Layer

An engineered air-space allows air circulation around the body and moves perspiration to the outer layer.

### Outer Layer

The outer layer is a barrier to rain, sleet and snow while providing a large evaporative surface for perspiration to escape.

## Permanent Scent Control

Each layer of the D-TEC™ System works to eliminate human scent. Embedded silver

compounds work with a unique coating to kill the bacteria that causes build-up of human odor. No regeneration required. Permanent scent-elimination lasts for the life of the garment.

## More Than Waterproof.

# D-TEC™ System

## D-TEC™ System Testing Performance

Products featuring the D-TEC™ System have been engineered to maximize comfort. Testing, a critical element in the development process, validates and proves performance.

## Lab Testing

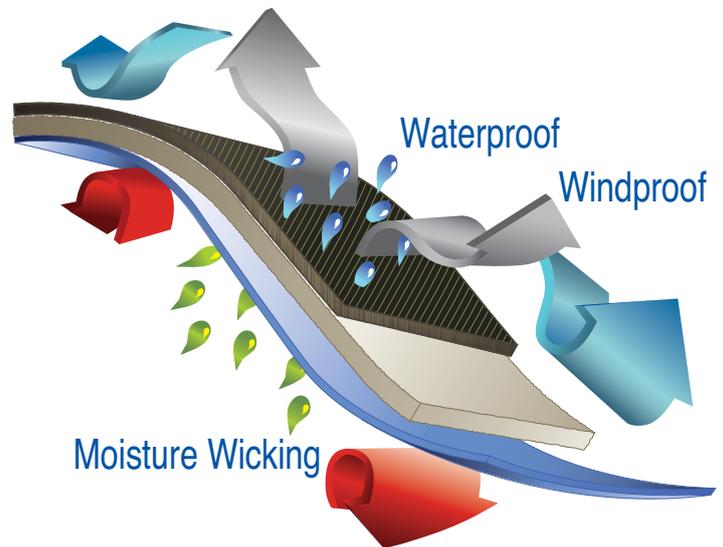

Materials are tested for durability and performance against rigorous standards.

## Field Testing

The most important tests are done in the field. Rugged field trials give real-life testimonials to the comfort and performance of the D-TEC™ System.

## D-TEC™ System

**Tested. Waterproof.

Interchange System

*Experience the Innovation*

**Rocky ProHunter Synergy** with the exclusive D-TEC™ System is the ultimate performance and versatility in hunting apparel.

The Rocky D-TEC™ system fuses permanent scent control and internal moisture management into a waterproof fabric outer shell with full air circulation. It's quiet, comfortable and durable. Underarm zips vent the body during high-levels of activity. Each ProHunter Synergy piece is athletically styled and cut to encourage movement and not get hung up during bow let-offs or hikes through brambles.

The ProHunter Synergy layering system allows hunters to customize apparel to fit their hunt. Wet weather calls for the shell. As temperatures dip, zip in a fleece jacket.

**Its performance hunting apparel for all seasons.**
